

## Peru 14. July to 29. August 2011 by Jens Ole Byskov

I was in Peru 25 year back in time, and I always wanted to return to this beautiful and interesting country. In my opinion, it is one of the most beautiful and varied in the world. Usually I arrange trips myself without guides and on public transport. But this time I decided to have a guide and car in a few of the weeks. It was certainly not cheap, but it saved me some good time, and the guides knew, where the birds were found. I arranged 25 days with Kolibri Expedition in Lima. Price depends on the number of people going. The rest of time I was on my own. In the 6 weeks of active birdwatching I saw or heard 820 different species.

14/7 Pelagic tour with Kolibri Expedition from Callao to the sea on the westside af San Lorenzo Island. Most birds seen were breeding birds from the islands.

15/7 – 16/7 Flight to Puerto Maldonado in Madre de Dios province in southeastern Peru. Both days birdwatching around town and at Infierno also close to town with guide from Kolibri Expedition.

17/7 – 22/7 2 hours drive to Rio Piedra and 3 hours by boat upriver to Piedra Lodge to excellent amazonian forest. Absolutely a top birdwatching place.

23/7 By taxi from Puerto Maldonado to Iberia close to the Brazilian border. Still with guide from Kolibri Expedition. Scrub, bamboo and farmland.

24/7 – 25/7 At Infierno with good forest. Last day flight back to Lima.

26/7 Visit to Santa Eulalia Valley near Lima. Gardens, scrub, woodland and fields. Late afternoon drive to Huanuco arriving late in the night. Start on an 8 days tour with Kolibri Expedition to central Peru.

27/7 From Huanuco all day visit to Carpish Mountain, Carpish Tunnel and Paty trail. Cloud forests.

28/7 From Huanuco all day visit to Bosque Unchog. Elfin Forest. Not a good day. Not many birds seen.

29/7 Traveled day Huanuco – Junin – Satipo. Stops at polylepis forest in Huanuco and at lakeshore at Junin Lake.

30/7 – 1/8 3 days birdwatching different places on Satipo Road. Last afternoon driving to Tarma with several stops along the road.

2/8 From Tarma to Lima with many stops and visiting sideroads. Puna grassland and bogs. Arid montane scrub.

3/8 Visiting Pantanas de Villa in Lima and Salinas area 70 km south of Lima. Seashore, desert and coastal lagunas and scrub.

4/8 All day driving from Lima to Chiclayo with only stops at Lomas de Lachay and a coastal lagune. Start on an 8 days tour with Kolibri Expedition to northern Peru. Mostly deserts.

5/8 Morning spent at Bosque Pomac near Chiclayo. Lowland arid scrub and acacia. Drive to Olmos and on to Limon. Tropical deciduous forest, arid lowland scrub and agricultural land.

6/7 Abra Porculla. I was quite sick. Almost no birdwatching. Overnight at Jaen.

7/8 Above the town of Jaen. Still quite sick. On the way to Abra Patricia visiting a butterfly reserve. Tropical deciduous forest and lowland scrub.

8/8 – 10/8 Abra Patricia area. Cloud forest, subtropical forest and upper tropical forest. Overnight at Afluente. Excellent area.

11/8 Driving from Abra Malaga to Tarapoto with various stops. Especially in Moyobamba where a sanctuary for hummingbirds was visited. 18 different hummingbird species seen at feeders. End of tour with Kolibri Expedition.

12/8 – 13/8 No birdwatching. Staying in Tarapoto.

14/8 Rio Mayo at Juan Guerra. Not a good place any more. From here no guide but rented a car with driver.

15/8 The Tunnelforest east of Tarapoto. Patches of upper tropical forest.

16/8 – 17/8 Morro de Calzada near Moyobamba. Upper tropical forest on mountain. Also tropical deciduous forest in outskirts of Moyobamba.

18/8 Back to Aguas Verde and Abra Patricia all day. Drive evening to La Florida.

19/9 Birdwatching at La Florida and the nearby road to San Lorenzo.

20/8 Drive from La Florida to Leimebamba in the Utcubamba Valley. Extremely beautiful. Many stops in the dry scrub habitat. Afternoon cultural visit to the ruins of Cuelap.

21/8 – 22/8 Abra Barro Negro mountain pass west of Celedin. Cloud forest. Also driving through Marañon Valley to Celedin. Arid montane scrub, agricultural fields and large river.

23/8 Marañon Valley mostly around Hacienda Limon. Humid and semi-humid montane scrub and second-growth scrub. Returning to Celedin.

24/8 Drive Celedin – Cajamarca. Several stops along road. Late afternoon in Rio Chonta rivercanyon northeast of Cajamarca. Riparian thickets and second-growth scrub.

25/8 Drive Cajamarca – Trujillo. No birdwatching.

26/8 Sinsicap Road east of Trujillo. Arid Montane scrub, riparian thickets and agricultural lands. Birdwatching all day.

27/8 – 28/8 Drive to Huaraz in Cordillera Blanca. No birdwatching.

29/8 Visit Lagunas Llanganuco north of Yungay. Lakes, arid montane scrub and polylepis woodland.

All birdnames are taken from BIRDS OF PERU by Thomas S. Schulenberg etc. with exception of recent splits.
